

Prepare to get your boots on the ground in the far west!

Some amazing field trips will be one of the real highlights of the 2019 NSW Landcare and Local Land Services conference as delegates head out into the landscapes in the iconic far west!

Delegates will be transported to one of four unique field trips, all which have their own appeal - you can choose which field trip you attend when you register. There is set capacity with each field trip so to avoid missing out on the field trip of your choice it is best to register early.

Broken Hill Solar Plant

The Broken Hill Solar Plant is one of the largest in the southern hemisphere. It is comprised of over 650,000 panels covering 140 hectares, and has a capacity of 53 MW which can provide electricity to over 22,000 average Australian homes. A representative from AGL will be giving a presentation on the solar farm and available to answer any questions.

Riddiford Arboretum

The second part of this field trip will be a guided tour of the Riddiford Arboretum. The arboretum features trees and shrubs native to the region. It was set up in 1988 on land that was a repair and oil transfer depot for the Silverton Tramway. Although named after Walter Riddiford, the Mayor of Broken Hill from 1949 to 1962, it is also a tribute to Albert Morris who was a self-taught botanist who was responsible for the establishment of the Regeneration Reserves around Broken Hill.

Select your field trip when you register

Visit the conference website and when you register select your field trip of choice < www.nswlandcareconference.com.au >. The website also has all the registration options and general information for delegates.
